

## Monthly Air Pollution Control Program Summary Report

### Concerns Received or Investigated Between October 16, 2024 and December 15, 2024

#### Concerns Received During Report Period

	Total
Total	212
Asbestos	16
Fugitive Particulate Matter	21
Hazardous Air Pollutant Release	2
Odor	48
Open Burning	94
Other	28
Particulates	3

Number of Notices of Violation (NOV) Issued: 3

Number of Referral Notices of Violation (RNOV) Issued: 2

Number of Letters of Warning (LOW) Issued: 9

#### Concerns Investigated During Report Period

	Total
Total	208
Concerns Received Before Report Period	12
Concerns Received During Report Period	196

Note: Concern Type refers to the air category the concern falls under. There may be more than one type associated with an individual concern, therefore the totals listed here may not reflect the total number of concerns received during the reporting period.

Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

#### Monthly Air Pollution Control Program Detail Report

##### Concerns Received or Investigated Between October 16, 2024 and December 15, 2024

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59395	9/30/2024	10/17/2024	IsoNova Technologies	Odor	Verona /Lawrence	SWRO	JW	Site Visit
<b>Concerned Party:</b> Robert Jungbluth								
<b>Concern Info:</b> CP reported strong odors between midnight and 2:30 a.m. He states that the odor was strong enough to wake him and his family.								
<b>Conclusions:</b> SharePoint #11185								
While I was using the nasal ranger, I observed excessive odorous matter deriving from the IsoNova Technologies facility twice within an hour but not within 15 minutes, which is a violation of state odor regulations per the AOC signed in October 2023.								
NOV SW#240057 issued 11/26/2024 tracked under ACE 59598, CNC 11/26/2024								

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59509	10/8/2024	10/16/2024	Tamko Building Products INC	Particulates Fugitive	Joplin /Newton	SWRO	BD	Communication In Person
<b>Concerned Party:</b> Melanie Heights								
<b>Concern Info:</b> The concerned party works in the Royale Heights area of Joplin. For nearly a year, they have always left work to find small crystalline dots of a sticky substance covering their car, but recently its gotten worse. They always figured it was tree sap, but it is happening to nearly every car within that general area. The only thing they can think it might be is the large factory in the area, Tamko Roofing. They called the company who denied it was them. The concerned party would like an update once any information is figured out.								
<b>Conclusions:</b> SharePoint #11281 No violations of 10 CSR 10-6.170 were observed during the investigation.								

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59512	10/10/2024	10/22/2024		Open Burning	Springfield /Greene	SWRO	BD	Referred to Other Agency
<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		"Nearly 24/7 burning of plastic and wood within the city limits of Springfield Missouri. Me and several neighbors have talked discussed/complained before and they don't seem to stop burning. Me, and most of my family and a lot of my neighbors have asthma which is flared up from the constant burning. There is always some amount of smoke in the air in the neighborhood be it day or night." First noticed 5/1/2024.						
<b>Conclusions:</b>		SharePoint #11296 Concern has been forwarded to the City of Springfield Environmental Division for review. Results of the investigation are attached to the concern document.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59514	10/10/2024	10/22/2024	Arlen and Rose Tunink	Open Burning	Walnut Shade /Taney	SWRO	BD	Site Visit
<b>Concerned Party:</b>		Dave Lingscheit						
<b>Concern Info:</b>		Neighbor burning insulation off copper wire, been going on for over a year, multiple times a week to nightly. Concerned party has noticed before, neighbors have talked to this resident, but wasn't until last night there was southeast wind came through his house and both him and his wife started coughing and had issues breathing. Both still have a cough and symptoms today. He called Western District Taney co Fire who came out and said they have had issues with this peron before and they recommended calling MoDNR.						
<b>Conclusions:</b>		SharePoint #11309 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed at the time of the investigation. Only household trash was observed burned at the location provided.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59535	10/9/2024	10/16/2024	Missouri Made Marijuana, LLC	Odor	Grain Valley /Jackson	KCRO	CK	Site Visit
<b>Concerned Party:</b>		Christie Pen						
<b>Concern Info:</b>		I-70 ABOUT A MILE EAST OF THE EXIT FOR GRAIN VALLEY IF GOING EAST BOUND. EVERY MORNING 7:15 AMISH AND EVERY EVENING 530 PMISH...IN THIS AREA FOR ABOUT A 3 BLOCK STRETCH IT SMELLS LIKE SKUNK OR POT SMOKE EVEN WITH ALL WINDOWS UP AND AC ON FULL BLAST. I TRAVEL I-70 DAILY						
<b>Conclusions:</b>		After conducting an odor investigation, I was unable to confirm an odor violation at a 7 to 1 level at the Missouri Made Marijuana facility.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59541	10/15/2024	10/18/2024	Daryl W. and Theresa N. Devore	Open Burning Odor	Blue Springs /Jackson	KCRO	JS	Site Visit
<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		CP reports that RP is working on cars in his driveway and fluids are often running into storm drains. CP reports that there are 5 cars on the property but these cars are often replaced. CP also reports that a burn barrel is being used giving off a chemical odor. CP reports that this has been going on for 3 years and has been reported to the City of Blue Springs many times.						
<b>Conclusions:</b>		No violations were observed. A letter with information on the hazardous waste and open burning regulations will be sent to the responsible party.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59569	10/15/2024	10/17/2024	Springfield Iron and Metal	Fugitive Particulate Matter	Springfield /Greene	SWRO	CR	Site Visit
<b>Concerned Party:</b>		Jeff Davis						
<b>Concern Info:</b>		<p>From email (email attached separately): Please see photos below and the attached photo of a piece of shrapnel found on BNSF property in our Springfield yard on October 8. Springfield Iron &amp; Metal routinely causes these explosions with their "car shredder" that send gas clouds and dust particles wafting over our property. More importantly, these explosions continue to catapult pieces of shrapnel from the automobiles or whatever they are crushing onto BNSF property near where our employees are working.</p> <p>In one of our previous conversations over Skype or Zoom, then Deputy Director Mike Sutherland offered his legal opinion the Missouri Department of Natural Resources has no jurisdiction. I am still concerned Springfield Iron &amp; Metal's continuing course of conduct poses a threat to the safety of BNSF employees working in the yard there as well as any nearby homeowners who are also likely experiencing particulate matter from these explosions drifting across their property in the early morning hours and never knowing it. I simply cannot comprehend and find it unfathomable that some law or regulation for which Missouri Department of Natural Resources has enforcement authority is not being violated.</p> <p>Please take notice these events are still occurring, that BNSF continues to record these events as they occur, and I would respectfully ask that you refer this matter to the Missouri Attorney General's Office for an independent review.</p> <p>Sincerely,</p> <p>Jeff Davis BNSF Railway</p>						
<b>Conclusions:</b>		<p>SharePoint #11340</p> <p>There were no air or solid waste violations at the time of the visit. Bussard did observed water pollution violations during his inspection and there are hazardous waste concerns that are prompting a full inspection. A memo has been sent to update the programs due to the facility's ongoing AOC.</p>						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59574	10/15/2024	10/17/2024	Owen Stevens	Open Burning	Seligman /Barry	SWRO	JW	Communication In Person
<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		Propane tanks exploded during open burning. Seligman Fire Department received a report.						
<b>Conclusions:</b>		<p>SharePoint #11350</p> <p>I did not observe any violations during this investigation. No action is required.</p>

59589	10/16/2024	10/17/2024	Jorge Garcia	Open Dumps Asbestos	Gower /Buchanan	KCRO	CS	Report UF
<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		A CP called and stated that a new owner purchased a 150-year-old house, and they are renovating it. The new owners have gutted the house. The CP stated that there is a lot of insulation, drywall, and sheet rock in the ditch on the property of the new house. The CP stated that there is a stormwater ditch that runs across the property and runs into a creek. The creek flows into the Platte River. The CP stated that you can see it from the road, or from the lake in the HOA.						
<b>Conclusions:</b>		Construction wastes dumped on the back part of the property. The property owner believed it was ok to do. Will take the waste to the landfill and send receipts. Report and letter sent to Jorge Garcia.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59592	10/17/2024	10/24/2024	Jeff Brion	Open Burning	Watson /Atchison	KCRO	CK	Site Visit
<b>Concerned Party:</b>		Tasha Gronniger						
<b>Concern Info:</b>		Received call from Alex Hilke with the department's environmental emergency response (EER). Hilke reports they were notified of a small tire fire at the property located at 200 Quality Row in Watson MO. This address location is right behind the Watson Fire Department. This station is a volunteer station and not manned all the time. EER stated that they were notified by the Sheriff's office that it is a neighbor feud over a fence. The sheriff's office has been out there multiple times. Sheriff's office is going to go back out there today to inform the property owner that it is illegal to burn tires and make sure it is not out of control.						
		I called the sheriff's office and spoke to the dispatcher, Chris. She told me that the parties involved in the dispute are Tasha Gronniger and Jeff Brion. Dispatcher reported they had received video from Gronniger of the fire, and it appeared small. I asked if the responding deputy could take photos of the fire to aid in our investigation.						
		Dispatcher also reported that they have notified the Watson Fire Department's chief, and he will respond later in the day as he is a local farmer.						
<b>Conclusions:</b>		After conducting a site visit to property, I was unable to confirm any burning of prohibited items in the burn barrel and firepit. I reviewed regulatory information and left factsheets with the responsible party.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59593	10/18/2024	10/16/2024	Ted Santi	Asbestos Other	Independence /Jackson	KCRO	CK	Site Visit
<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		Via Webform - Submitted at 11:09 am Friday, October 18, 2024 - Date of Incident or First Noticed 10/11/24 - A demolition of a commercial gas station, old underground tanks laying around. Building does not seem to have had an environmental inspection prior to demolition and no demolition permits for building or tanks.						
<b>Conclusions:</b>		The convenience store had already been demolished at the time of the investigation. A report with Unsatisfactory Findings will be issued to Santi Construction and Pabst Construction for failure to inspect for asbestos and failure to submit a demolition notification.

<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		Lots of dust leaving this property. Covering cars in the area. When you leave the windows in the house open, it comes in and settles on everything. I know some about air permits and I looked theirs up. First, it says the primary emission point has to be at least 600 feet from the nearest property boundary. The lower lot, according to google earth, doesn't allow for that equipment to be that far away, but that is where they are operating it at. I also have not seen any water being applied to try and help the dust.						
<b>Conclusions:</b>		SharePoint #11378 No violations of 10 CSR 10-6.170 were observed at the time of the investigation.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action

59622	10/18/2024	10/23/2024	Jeremy Reed	Open Burning	Calhoun /Henry	KCRO	DS	Site Visit
<b>Concerned Party:</b>		Betty Hibbs						
<b>Concern Info:</b>		The concern party called on 10/18/2024 stating that Jeremey Reed was removing shingles from a dilapidated house and burning them in a burn barrel on his property. On 10/22/2024 I spoke with the concern party; they said that there is a one block area in town that has four dilapidated houses on it and that Jeremey was removing the shingles from the smallest house and is hauling them over to his place and burning them. They have not seen this occur but there is an acidic small in the air that made their nose bleed.						
<b>Conclusions:</b>		A site visit was conducted, and I interviewed Reed and the property owner where the shingles were alleged to have come from. I did not observe any evidence that shingles had been removed or burned. No violations found.

<b>Concerned Party:</b>		Kyle Defrain						
<b>Concern Info:</b>		<p>From Webform Email - REQUEST FOR ASSISTANCE Our small community area need assistance with controlling the dust being kicked up by traffic on our gravel road. The dust is so thick that visibility is very dangerous. At times, especially in the AM and PM, everyone must be in doors due to the danger of the particles of dust, comparable to baby powder. We have repeatedly asked our county commisioner office for help by requesting chip-seal (over 30 residents signing a petition) but are not getting the help we desperately need. We are literally being choked out of own homes, personal property is being destroyed and livestock are suffering. The only advice we get back is to treat the road with a chemical we do not want because our drinking water resources are close by, and these chemicals can possibly taint our water supply. Please PLEASE help us. The area is the gravel part of 227th St. Approximately 5 miles southwest of Peculiar city limits. My address is 7501 East 229th street. Our community is located on a dead end stretch of about 2 miles of dusty gravel. The traffic doubles due to no outlet, so we must endure constant dust clouds not only from local traffic here but includes delivery vehicles such as Amazon, FedX, school buses, trash trucks. The list goes on and on. Delivery trucks, especially, do not slow down possibly because of schedules for delivery times, which adds to the problem. Please come and see for yourselves why we NEED chip-seal, if not MORE than other areas.</p>						
<b>Conclusions:</b>		<p>Dust from unpaved public roads is unregulated in Missouri; therefore, the Missouri Department of Natural Resources has no means to coerce the county into chip sealing this road. While a significant amount of dust can be generated from these roads, these emissions do not violate any environmental regulations.</p> <p>I encouraged the concerned party to continue working with the County on this issue, as any resolution will need to come from the local government. I also provided a link to our website with some general information on dust control options: <a href="https://dnr.mo.gov/document-search/dust-suppression-unpaved-roads-pub1291/pub1291">https://dnr.mo.gov/document-search/dust-suppression-unpaved-roads-pub1291/pub1291</a></p>

59626	10/21/2024	10/22/2024	R&R Construction	Asbestos	Maryville /Nodaway	KCRO	JS	Site Visit LOW
<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		<p>The Air Pollution Control Program received an environmental concern regarding a demolition in progress. It was described as a 1-story hotel (takes up a whole block) on 71 Highway in Maryville, Missouri. The caller indicated the demolition is north of Hy-Vee; also north of McDonalds by half a block. The concerned party said it is clearly visible from Highway 71.</p>						
<b>Conclusions:</b>		<p>A Letter of Warning has been issued to R&amp;R Construction and to Twaddle Realty, Inc., for failure to inspect for asbestos prior to demolition and failure to submit a demolition notification.</p>

<b>Concerned Party:</b>		Jessy Short						
<b>Concern Info:</b>		<p>Nearby homeowners are complaining about emissions from the business smelling like "burnt mustard" and complaining of a "gritty" particulate in the air in the morning hours around 7:45 am to 8:00 am.</p> <p>Complainant alleges he has witnessed this a couple of times over the past week while putting his son on the school bus in the morning. He described the smell as "choking" and stated he has trouble breathing.</p> <p>Complainant also alleges he has called both the police and fire department, who advised him to stay indoors during the events.</p>						
<b>Conclusions:</b>		<p>The facility is currently operating a small-scale research and development (R&amp;D) process. No violations were observed at the time of investigation; however, the process was not running. Odors were likely due to resuming the process after an extended shutdown period. Further surveillance may be required if additional concerns are received.</p>

<b>Concern Info:</b>		Blast sound heard over neighborhood at approx. 10:05 pm. House and windows shook. This happened a few times at daytime during this summer. High noise levels and ground shaking.						
<b>Conclusions:</b>		The blast was conducted in coordination with the Cass County Sheriff's Office, Lee's Summit Police Department Bomb Squad Unit, and the Explosive Ordinance Disposal Team from Whiteman Air Force Base. The blast was conducted at the nearby APAC Quarry to safely destroy explosive ordinance discovered in a nearby home.

<b>Concerned Party:</b>		James Kilburn, Brookline Fire Chief						
<b>Concern Info:</b>		CP stated that open burning of brush and other natural materials was occurring near 1015 S Miller Ave. in Springfield. The CP stated that the burn pile was within 100 feet of the property line and 150 feet from the nearest structure. In addition, the CP stated that the burn pile was within about 500 feet of the Willard Orchard Hills Elementary School located adjacent to the property. The CP does not know who owns the property, but was told that he is clearing brush to build a home on the lot, confirming that it isn't a commercial development.						
<b>Conclusions:</b>		<p>SharePoint #11443</p> <p>No site visit is necessary. Given that the open burning activities involve non-commercial vegetative waste, the department does not have regulatory authority to limit the burning unless the fire department can formally declare a threat to public health. 10 CSR 10-6.045 setback limits only apply to commercial land clearing operations.</p> <p>I called fire chief James Kilburn at 12:05 p.m. on October 25, 2024 to describe this section of the regulation. Kilburn is no longer concerned about the threat to public health. Kilburn stated that his fire department contacted the responsible party on October 24, 2024 and requested that they limit the vegetative waste burning to weekends when the nearby elementary school is out of session. Kilburn described how the property owner has been receptive and will probably no longer burn vegetative waste. Kilburn's main concern was about the drought conditions but those have since been alleviated by recent rains.</p> <p>I did not observe any violations during this investigation. No action is required.</p>

<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		<p>On corner of intersection of salt and pepper roads there is a property that is littered with leftover construction materials, trash junk and overgrowth. It is a block to 2 blocks from the Noel elementary school. There is a bathroom on the property that is not enclosed inside of the building. Shed structure that has no running water or plumbing that is used as an outhouse and is not properly disposed. They put your animals there out in the open.</p> <p>There's lots of trash lots of save materials Dario's. It gets littered into the hia waste. And they actually had a fire. I believe around April of 2023. I'm not positive. Wear a fifth wheel camper and RV and 2 houses caught fire and burnthe property was littered with material. It was a fire hazard to begin with.</p> <p>The existing structure that is, there was built onto and around the only camper that survived the fire since then. They have doubled or tripled the waste and trash on the property. So it's a much bigger fire hazard and after doing some. Looking into the residents there at the address of 788 salt road Noel Missouri. The person is living on the property on the corner of salt, and pepper has a property in town in city limits. No Missouri on king's highway and is currently being fined for not having it kept. He has abandoned the property, it's overgrown. And he's been issued fines and doesn't do anything about it. So this is a repeated offense. I.</p> <p>Just don't understand who can drive by such a residence and not say something. The neighbors in the neighborhood surely do not want their properties to be compared to thathere's animals running loose trash. They don't use trash containers. They don't have a person that picks up their trash containers. Or a business. I mean, butchering animals out in the open on the same land where they raised them grazed them and they.</p> <p>So I'll when they're bodily waste. I'm not sure I'm not sure I'm phrasing any of this properly. I feel like something needs to be done. Why a person can be allowed to destroy and litter up and cause hazards on multiple properties and not be punished is a gross negligence In my opinion.</p>						
<b>Conclusions:</b>		<p>SharePoint #11516</p> <p>No solid waste violations present at the time of the investigation. Most of the concerns noted in the webform do not fall under solid waste regulations.</p>

<b>Concern Info:</b>		<p>Webform - There is a big dump on the property that they burn off at night . In this dump is tires, paint , shingles , oil , asbestos, dead animals, and any thing else anybody wants to dump . The biggest concerns are all of this is getting washed into the creek that runs beside it that has a ditch from the dump to the creek . The creek has a fuely oily smell and you can see it on top of the water . This creek runs into the city lake where people swim , fish , and from that lake the water travels all the way to Truman lake ! The city knows about this dump and when it gets to big the city actually pushes it back with their own equipment. There is a lot of farms and people that use this creek as means to water their crops and livestock .</p> <p>On the right side of the house there is a drive that the city of Appleton City maintains due to they have a lift station right beside the dump , but the dump is not on city property . City Chief of police , the fire chief, and all city maintenance men know about this dump that has been there for years and is being overlooked because they also dump their hazardous items in the dump. Just drive down the drive on the right side of the house and you will run into it about one thousand feet behind the house .</p>						
<b>Conclusions:</b>		<p>SharePoint #11555</p> <p>The dump is a promiscuous dump. The city is placing a gate to prevent access. Morris has pulled out the tires from the pile.</p>

<b>Concern Info:</b>		Caller reports that Alan Butler is burning copper wire, tires, and car parts from auto salvage. States that his family owns several lots at 102 Main Street and north of that up to but not including the mechanics shop. States the burning is done between and behind two mobile homes, done at night and has been going off and on for the last year or so.						
<b>Conclusions:</b>		I was unable to contact anyone at any of the mobile homes on the property. I was able to observe the area described by the complainant from the driveway and the door to the main mobile home and I noted multiple junk piles, one of which appeared to have minor char on a log and also contained soda cans and beer bottles. I did not observe evidence of burned prohibited material. An informational letter will be sent.

<b>Concerned Party:</b>		Joyce Bennett						
<b>Concern Info:</b>		Caller states that an apartment building filled with mold was demo-ed. Now the scrap pile is burning with all sorts of building material. The smoke is really bad. The caller would like to be notified afterwards of outcome.						
<b>Conclusions:</b>		SharePoint #11572  During the investigation, it was found that the responsible party failed to hire a state-certified inspector to inspect the regulated structure for the presence of asbestos prior to demolition activities. Additionally, illegal open burning and solid waste disposal activities were observed. The nature of the disposal and burning practices during the demolition warranted escalating the concern to an NOV. See NOV #SW240067. No waste tested positive for asbestos and the open burning activities mostly involved untreated wood. The required actions included education on the demolition requirements related to asbestos testing and DNR notification, signing the Letter of Acknowledgment, and providing proof of proper disposal of the regulated solid waste. These required actions were fully resolved as of 1/8/2025.

<b>Concerned Party:</b>		April Wardlow						
<b>Concern Info:</b>		The following concern was submitted to EPA on Friday, 10/25/2024, which was forwarded to MoDNR on Wednesday, 11/06/2024: Andy Nguyen owns a vacant property near me at 1621 Elmwood Avenue. He has been burning toxic building materials (linoleum, treated lumber, etc.) sporadically in the backyard of the vacant house over the last 2-3 months. We have made several reports to the city about this situation, and a health inspector has been out a couple of times giving the owner warnings that he cannot do this. However, since the health department has come out to investigate, he has started burning after hours to avoid being caught in the act. We resorted to contacting the fire department after hours. We were able to get pictures to submit another report yesterday evening, as well as emailing those pictures and evidence to the health inspector directly. We can smell the smoke and fumes inside our residence. My husband is currently dealing with a health condition that is exacerbated by this, and I am sure he is not the only one being affected. Nothing continues to be done about this individual and his illegal burning. I have additional videos and documentation I can provide that I was unable to submit with this report.						
<b>Conclusions:</b>		This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.

					/Bates			
<b>Concerned Party:</b>		Levi Julien						
<b>Concern Info:</b>		The following concern was submitted to EPA on Wednesday 11/06/2024 at 1:37 p.m. and referred to MoDNR on Tuesday 11/12/2024 at 1:30 p.m. Every cloudy night for the past few months they have been burning tires in the back of their lot. It's like a junk yard because they own a towing company but the smell of rubber fills the town every night so bad we can't even open our house windows. I could see smoke last night coming from their house but it was too dark to get a video.						
<b>Conclusions:</b>		I was unable to gain access to the site during the investigation; however, Ron Brown admitted during a telephone conversation that he used a tire to ignite a brush fire. Brown was advised not to burn any more tires. The open burning regulation and fact sheets will be provided.

<b>Concerned Party:</b>		Chris Collum						
<b>Concern Info:</b>		Recieved a concern from the EPA. The CP states: "I live 2.1 miles from the Veolia Waste incernation plant. My home is on the Missouri side of the Mlssissippi River. In St. Louis on S 18th between Hickory and Choteau. Essentially every night for several months there has been an acrid smell starting around 9-10 pm and lastin until around or shortly after dawn, like the smell of a labtop or cell phone battery burning or overheated. We can smell it inside our house at the end of the house that is further east. Some days it is worse than others. Tonight the smill is especially strong and the wind is coming from the SE - the direction of the Veolia Plant. I am going to make this report every time we can smell the odor. Please investigate if your aren't - This plant needs to be shuttered as there is no way they're following applicable laws if we can smell the burning inside our home with the windows shut two miles away."						
<b>Conclusions:</b>		No violations were issued during the investigation. Follow-up with the CP was done via e-mail.

<p><b>Concerned Party:</b> Dennis S. Scherer</p> <p><b>Concern Info:</b> To Whom It May Concern:</p> <p>I would request that our name and address be kept confidential.</p> <p>It is my understanding thru information from Wright City Fire Department that the controlled burn off westwood drive in Wright City has not received its final approval for this burn. I would like to request that this controlled burn be required to use forced air to help complete the burning process. I was informed by the Fire Department that after September 15 its not required by law. I'm requesting the force air because on Friday when they were illegally burning, the ash from their burn covered my truck hood that I had washed the night before, my neighbors pool water was contaminated with ash and another neighbors pool cover was covered with the ash! The smoke from the burn has irritated my throat and I still have a headache. I realize they need to dispose of these trees but again would request the forced air or have the trees grounded up for mulch.</p> <p>Thank You for your assistance: Michelle And Dennis Scherer 326 Carolyn Circle Wright City, MO 63390 314-602-0432</p> <p><b>Conclusions:</b> There were no violations occurring at the time of my visit and the pre-planning stage was going to include an ACI and burners. I spoke to the CP where I explained to them the anonymity situation in regard to the concern, so the CP withdrew their concern and wished to remain anonymous.</p>

<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		Received by email: On Wednesday, October 30, the Critical Mineral Recovery battery plant exploded causing toxic fumes to spread over the area. The flames are still not completely out since the materials burning contain lithium. We are unfortunately not being guided on how to test or how to procede with our water. There are thousands of dead fish in the creeks and lake in the area. The plant was located next door to much of the community including many homes and businesses. This seems to be a situation that is bigger than this community can handle. We need help and those with expertise in dealing with a situation of this magnitude.						
<b>Conclusions:</b>		continued efforts pertaining to the monitoring/sampling of surface water, drinking water, air, and other pertinent media is on-going.

<b>Concern Info:</b>		Concerned party emailed a letter (see concern document set) and Google drive links to two videos showing the neighboring property open burning unknown materials that were creating dense white smoke. The concerned party reported that this went on for several hours and the thick smoke made him and his wife sick. This concern has been worked before (see concern 11,309), but no open burning violations were observed at that time. Both the responsible party and the property owner have extensive histories on casenet.						
<b>Conclusions:</b>		SharePoint #11677 No violations of the Open Burning regulations were observed at the time of the investigation.

<b>Concern Info:</b>	Submitted at 1:19 pm Monday, November 18, 2024 Date of Incident or Date First Noticed 11/14/2024 From Webform Email: The subject property is under demolition. Part of the building has transite siding. No measures are being taken to control asbestos containing materials from migrating to nearby properties via fugitive dust. I reported this to the city of Parkville, which had no interest in taking issue with the activities observed. Concerned that continued activities will result in ACM exposures and improper disposal.							
<b>Conclusions:</b>	On onsite visit was conducted on 11/19/2024. The project appears to meet the residential exemption for asbestos air pollution regulations. Regardless, siding was being removed by a registered asbestos abatement company. No fugitive dust was observed leaving the site. The abatement company and owner were advised of the fugitive dust regulation. No violations were observed.

<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>	Concern party (CP) called to report a concern regarding the LCPWSD#1 White Fences Subdivision WWTP in Elsberry. CP complained about unbearable odors and also runoff, which occasionally has a black appearance, from the facility going thru their 6-acre property as well as thru other nearby properties. CP and CP's neighbors have livestock and CP is worried about black runoff from WWTP impacting their livestock. CP has contacted LCPWSD#1/the District in the past but they see no progress on addressing the issues. The CP's property is located southeast of the White Fences subdivision/WWTP. The District has told them that White Fences subdivision users are dumping illegal stuff in the collection system. I asked the CP if they knew what the District was referring to with "illegal stuff" and he mentioned the possibility of drugs. The CP claims issues with the WWTP have been going on since 2017 with no much progress noted.							
<b>Conclusions:</b>	I concluded that an investigation would not be sufficient. So I have scheduled a full inspection of this facility to be taken place November 6, 2024.

<b>Concerned Party:</b>		Joseph Williamson						
<b>Concern Info:</b>		<p>From Incident Number 2024-00036178 provided via email from KCRO (see concern document set):</p> <p>On the above date and time Northwest Fire was dispatched by Camden County 911 for a residential structure fire across the cove. Dispatch had a difficult time determining which jurisdiction this was in and who to tone out. Units responded emergency. While responding Camden County 911 advised all units the caller believes the construction company intentionally ignited the residence. Units had a difficult time locating exact location of the fire. Units arrived on scene and found a residence fully involved and had already collapsed. Several explosions were heard as well as thick black smoke visible from the fire. A construction company on scene had workers in structural fire gear and had a pump pulling water from the lake and spraying down the house and exposures. No individuals were members of our organization and the company was not from the area. The construction company would not allow the fire department near the scene and advised they had it under control. The residence sat approx. 50 feet from the waters edge and had collapsed onto the seawall of the lake with obvious runoff into the lake. Information was taken from a vehicle parked near the scene with a logo on the side, the owner claimed to be a retired firefighter and did not see anything wrong with what he was doing and did not contact the fire department. Command terminated all Northwest Units clear the scene in service. Northwest fire responded 2 engines, 1 tanker assisted by Coffman bend 1 tanker, 1 fire boat, Deer Creek 1 engine, 1 tanker. A total of 16 firefighters responded to his incident.</p> <p>The following are individuals who were on scene representing the company.</p> <p>Mike Kemp (Owner) 816-944-3911</p> <p>Jacob Ragsdale 319-464-0984</p> <p>Shane Ragsdale 319-404-5451</p> <p>Victor Furnandez 913-269-5894</p>

<b>Concerned Party:</b>		Lena Latham						
<b>Concern Info:</b>		The EER spill line forwarded Lena Latham's fugitive dust concern as follows: "The duty officer reached out the original caller and asked for clarification on the issue. The caller stated that small white plastic beads and small pieces of plastics sheeting was being released in the air from the construction site. The caller stated that her hair was covered in the unknown material and that the material was covering cars in a next door property parking lot. The caller stated that she was approximately 20 to 30 feet away from the site when she noticed that things around her were being covered in the substance. The caller is concerned that the construction site is not containing any materials that they are applying or removing from the renovation of the hotel. This incident is being referred to the Department's Southwest Regional Office for further investigation." The department called Lena Latham on November 20, 2024 to follow-up with her concern. Latham then provided additional details about the fugitive matter, describing the dust as "lightweight pellets that look like snow, almost like popcorn ceiling." Latham then demonstrated that recent Google Streetview footage pictures the renovation occurring at Comfort Inn. Latham is concerned about exposure of pollutants to the public. Latham was not aware at the time but this project is regulated for asbestos as well.						
<b>Conclusions:</b>		SharePoint #11727 During the investigation I observed the entity causing the release of particulate matter over the property boundary which is a violation of 10 CSR 10-6.170. The facility was required to identify the source of particulate matter and mitigate such emissions. By the time the report (NRR) was sent to the entity, they had vacuumed up the littered styrofoam. No further action is required.

<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		Date of Incident or Date First Noticed 11/22/2024 From Webform email: Property has become a nuisance to say the least.Every 2 weeks & sometimes weekly for the last couple months, this over the road semi truck, has been dropping trailers in the road & idling at all hours of the day & night in front of 11209 E 62nd Street.Sometimes the idling will last literally 8 hours or all day & night if the guy has a reefer truck it never turns off until he leaves. This will be a 2-3 day time frame at the very least. This is a residential neighborhood nowhere near any truck stops or even gas stations. Needless to say we need some help & our quality of life is downright suffering. Not to mention I have a newborn baby in a facing room that can't possibly sleep the night through an idling semi truck. When he completely aggravates everyone on this street he will move the idling semi around the corner with an associated house at 6216 Crisp Ave, Raytown, Missouri 64133.						
<b>Conclusions:</b>		While the department does have an idling restriction regulation, the regulation would not apply to refrigeration trailers. Also, the truck would be allowed to idle if the driver were in the sleeper berth on a mandated rest period. Since our regulations may not fully address the concerned party's issue, I discussed the situation with the City of Raytown's Code Enforcement. They confirmed the area was residential and such activity would be against city code. I forwarded the information to Raytown Code Enforcement, who agreed to investigate the report.

<b>Concerned Party:</b>		Ryan Haupt						
<b>Concern Info:</b>		From forwarded email from APCP receptionist: I'm writing this morning to report a major air quality issue that's been persistent for months and keeps getting worse. The address is 14514 S US 71 and the name is apparently Holistic Missouri. There are multiple days per week including this morning where the marijuana smell is so sharp and strong it actually enters your car even when the air or heat is off and the windows are up. It smells very toxic and it overcomes drivers and passengers in a dangerous way. It's so strong you can smell it over a half mile away sometimes and even driving by at 70 on I-49. Please let me know how this is going to be addressed or what can be done because this is a very serious air quality issue.						
<b>Conclusions:</b>		Odors were present, but not in violation of Missouri Air Conservation regulations. Concern was referred to the Missouri Department of Health and Senior Services, which regulates cannabis cultivators. Part of those requirements is the implementation of an odor control plan. Also, since the facility is within Kansas City, the concern was also referred to the City's Air Quality Program.

<b>Concerned Party:</b>		Name not given						
<b>Concern Info:</b>		Submitted at 11:04 am Wednesday, November 27, 2024.						
		Please describe your concern, including the location on the property: Burning of tires. South side of road at coordinates 38.51020° N, 93.42950° W.						
<b>Conclusions:</b>		After conducting the investigation, I could not find evidence of burning tires in the burn pile, and the responsible party denied burning tires. There were more than 25 scrap tires, so this issue is being referred to the solid waste unit. Open Burning regulatory handouts were provided to the owner.						
		SW: Letter sent to the property owner/tenants to inform of solid waste and scrap tire regulations.

<b>Concerned Party:</b>		Mona Miller						
<b>Concern Info:</b>		Mona Miller called and stated that a contractor, Steve Redford is clear cutting the entire mountain behind the RV park she lives in. The burn piles are no more than 200 ft. from properties. The flames are shooting as high as 25 feet and there is fine white ash all over everything. Most residents are older and having issues breathing in the air.						
<b>Conclusions:</b>		SharePoint #11795 Open burning violations were observed. The responsible party was burning material overnight and ash was leaving the property of origin. Concern 11767 ACE 59956 was also issued for this investigation.

<b>Concerned Party:</b>		Leslie Combs						
<b>Concern Info:</b>		Concerned party reports two events of burning vegetative waste.  One was about a month ago. Concerned party observed five dump truck loads being brought in. What he could see looked like branches. Said they dug a hole and used a blower (most likely an air curtain) to burn.  Then on Thanksgiving, he observed a large fire consisting of vegetation that has been building up on the site for 20 years. Smoke was very bad, so he called the fire department. Fire department did not do anything until that evening, but only sent a passenger vehicle to look at it. No firefighting equipment was brought in, and no fire suppression was attempted.  Nothing happened until today (12/04/2024) after he called the representative's office. Then the city brought out an end loader, backhoe, and firefighting equipment. The situation is better but still smoldering.						
<b>Conclusions:</b>		The fire reported on Thanksgiving appears unintentional. The previous burning with the ACD appeared in compliance with air regulations; the ACD was placed at the proper distance from any structures at the time of its use. However, since this is the site of a closed landfill, authorization was required by the Waste Management Program. KCRO's solid waste unit will issue Unsatisfactory Findings for the unauthorized activity.

<b>Concern Info:</b>		EPA received 11/19/24 (Department received 11/27/24) Caller reported concerns with air quality around BRNC Concrete Company on Highway 61 in Jackson, MO. Reported to appear like smog and does not occur constantly. The timing seems random but has been more frequent in the mornings than the afternoons. Caller reported reoccurring respiratory infections and animals wheezing.						
<b>Conclusions:</b>		Upon receiving the concern, it was observed that this was a site the department had visited in October 2024 for a similar concern. Hayden Cassinger reached out to the Ready-Mix Plant who stated that everything has been running as intended. It was discussed to report malfunctions if they meet certain permit requirements. I left a message with Lory, concerned party, stating that the department will continue to monitor the location and if certain emissions are observed, we will discuss and investigate further. At this time, no violations have been observed. The department will continue to monitor the location when in the area.

<b>Concern Info:</b>		Via Webform - Submitted at 6:25 pm Sunday, December 8, 2024 - Date of Incident or First Noticed - 07/01/2024: So I've been smelling this really weird smell outside off and on for a few months, but now it just smells like this every night. It's a very strong chemical smell, sickeningly sweet and the closest comparison would be like toasted strawberry poparts. I noticed it at first just around Pickett and Riverside, but now it's moved to the area around The Ridge of Saint Joseph apartment complex. Not sure how far it goes out but it gives me a headache with how strong this smell is. I'm not sure if this is the right place to be contacting, or if it's a bad thing, I have just never smelled something like this and it comes back almost every night, at least once a week.						
<b>Conclusions:</b>		I could not locate the odor or determine the source during the investigation.

<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		Via Webform - Submitted at 11:26 am Thursday, December 12, 2024 - Date of Incident or First Noticed - 11/15/2024:  As a concerned citizen, I am writing to report a troubling observation involving Mainline Services, a commercial motor vehicle fleet operating on public highways. I have noticed that several of their vehicles appear to have tampered with or bypassed diesel exhaust protection systems, including Diesel Particulate Filters (DPF), Selective Catalytic Reduction (SCR) systems, and other components integral to meeting state and federal Environmental Protection Agency (EPA) emissions standards. In multiple instances, it seems that primary emissions control equipment has been removed entirely, leaving only exterior parts and accessories designed to give the false appearance of compliance. These modifications undermine essential environmental protections, pose risks to public health, and violate EPA oversight regulations. I urge the appropriate state and federal EPA authorities in Kansas City, Jackson County, Missouri, to investigate this matter promptly and take necessary enforcement actions to ensure compliance with emissions standards.						
<b>Conclusions:</b>		Regulation of defeating emission controls on mobile sources has been retained by the Environmental Protection Agency (EPA) and has not been delegated to the department. The concern was referred to EPA Region 7 for investigation.

60086	12/5/2024	12/6/2024	Mike Horner	Open Burning	Van Buren /Carter	SERO	BC	Report
<b>Concerned Party:</b>		Anonymous						
<b>Concern Info:</b>		cp states: Over the past year and a half, Mike Horner (Previous mayor of Van Buren) has bought an old house on the corner of East Pine and Chickapee (beleives address is 126 East Pine). Since he purchased the home he tore down the house and burned the debris along with the shingles and asbestos siding. Since the burning of the original house he has continued to haul in debri from multiple house that have been torn down and burned at this location. This includes Shingles, Tires, and asbestos siding. He also stated that they typically only burn debri at night to hide the black smoke. Soot from teh fires generally covers vehicles and property in neighborhood. The debri piles and burning are located next to a creek that runs into the current river. mentioned previous concern that was report but stated that the owner (Mike Horner) continues to burn debri there. Mentioned see many tires, and piles of shingles. Also mentioned that the owner had hauled in shingles from roofing tear offs and burned them on the location.the following are directions to two locations of houses that have been torn down and hauled to this location and burned: 1st house was up Crafton Drive - up the hill would have been 3rd house on the right. 2nd house was across from Big Springs Motel on the right hand side.						
		CONCERNED PARTY						
<b>Conclusions:</b>		Mr. Horner was issued a Letter of Warning on 12/17/2024 with no response required due to the cleanup being completed and proof being sent to the department.

60090	12/13/2024	12/18/2024	Wayne Choate	Opacity Odor	Springfield /Greene	SWRO	JW	Communication In Person
<b>Concerned Party:</b>		Allan Kiser						
<b>Concern Info:</b>		See concern 7694. Allan Kiser called on Dec 13, 2024 to report Wayne Choate for releasing excessive smoke and odors from his auto shop at night. Kiser says this is a yearly occurrence during the winter months. Kiser texted a department work cell phone the following: "I literally live next to bass pro shops and a rail road track. I have a pretty high tolerance for crappy neighbors. This is extreme to where it actually disturbs my peace." Kiser also texted the department a video of the smoke wafting out of Choate's shop on the night of December 12, 2024. Kiser stated that he "just wants the owner to be more reasonable" about his burning practices. Kiser is offering to help Choate pay for a new, more efficient furnace.						
<b>Conclusions:</b>		SharePoint #11926  I did not observe any violations during this investigation. No action is required.

60103	12/12/2024	12/18/2024	Randy Sheldon	Open Burning	Osceola /St. Clair	SWRO	JW	Email
<b>Concerned Party:</b>		Christina Clark						
<b>Concern Info:</b>		Christina Clark, a citizen who recently reported concerns about an asbestos project in Osceola, sent the department another email: "I appreciate your timely response to my inquiry...I have another problem ..recently our neighbor has been clearing a lot and building fence for his cattle...the property was purchased by the neighbor full of the former property owners belongings following his death...my concern is..mobile homes, boats and years of things belonging to former landowner are being burnt...it smells awful is there anything can be done...the man has money to properly dispose of items and instead choosing to burn those things making our air in the neighborhood toxic...law enforcement wont do anything..fire chief works for the man as assistant coroner. Any insight...my family is tired of smelling it...10 NE BUSINESS HIGHWAY 82 Osceola Missouri former residents Vernon Leroy and Peggy Conrad..now owned by county coroner and his son I know we can't be the only ones in the neighborhood having to endure this horrendous smoke coming from the former belongings of the Conards...it seems like the people with all the money in this town have the attitude I have money so I'm going to do whatever I want when I want and do not care for what others are having to deal with due to their actions. Please he has the money to properly dispose of trailers and boats etc..not kill us by the toxicity of what's burning."						
<b>Conclusions:</b>		SharePoint #11909						
		I arrived at the property around 3:00 p.m. I drove up to the west side of the property where I observed 2-3 piles of burn debris, each of which composed no greater than 10 cubic yards. The piles were at least 50 meters from the roadway. Unfortunately, no one was on site so I could not establish contact with the responsible parties and find out whether there was regulated waste in these burn piles. Google Maps satellite imagery showed that the property (at one point) hosted mobile homes and other metallic structures. I did not see any such structures during my investigation. It appeared as if there were metal components stuck in the burn pile, but again, I could not access the property to confirm this supposition. Ultimately I did not find evidence of illegal open burning. I left the region around 3:12 p.m.						
		On December 23, 2024 I managed to find the contact information for the property owner. I reached out to Randy Sheldon, the county coroner, and inquired about his recent acquisition of the property. Sheldon stated that he "had some guys hauling stuff off" because "the previous property owner left things like a mess." Sheldon would not explicitly state whether any of the former structures on the property were demolished and, if so, where the waste ended up. However, Sheldon did say that he had plans on hauling off the burn waste as soon as possible. I informed Sheldon about the solid waste and open burning regulations as applicable. I thanked Sheldon for his time and ended the phone call at 3:53 p.m.						
		I did not observe any violations during this investigation. No action is required.

<b>Concerned Party:</b> Lisa Meyer <b>Concern Info:</b> We recieved an open burning concern from the DNR webpage. The CP states "I live in Moscow Mills Missouri and there is a city ordinance against burning but there is a construction site on Tropicana Village Drive in Moscow Mills Missouri that keeps burning huge piles of outdoor waste. (Photos attached)  I contacted the Mayor and the city did get involved, but it did not stop the construction company from burning. The burning has been happening for two weeks, but Monday November 11th it came to a head. They started burning multiple large fires, over 10-20ft tall. The smoke filled the streets of Moscow Mills and could be seen in the sky from Troy, MO.  The very next day, Tues Nov 12, I was hospitalized at Progress Hospital West in O'Fallon Missouri from a bronchospasm due to asthma. I showed Dr Hill and the Nurse Practitioner the photo and they said smoke like that could definitely cause asthma attacks and bronchospasms in anyone with allergies, asthma, COPD, or other breathing relating diseases and disorders.  I am reaching out to ask what can the citizens of Moscow Mills Missouri do to stop this company from burning, even though they're willing to pay fines and continue burning.  And how can we check air quality on the days they burn? Please.  I've lived here 16 years and never experienced something like this.  I appreciate any help or tips you can give! I am frightened for my life in my own home. Please help!"								
<b>Conclusions:</b> An onsite site investigation was conducted and no open burning violations were found.

<b>Concerned Party:</b> Kelly Jones <b>Concern Info:</b> We recieved an open burning concern from the DNR website. The CP states "We live on Eldorado Drive, one street over from where Pollard Properties has a construction project (off Tropicana Village Dr). We know they have been burning things for the past 2-3 weeks, because we would notice the smell off and on. However, on Monday Nov 11th, whatever they were burning was making the air very toxic. I was coming home around 4-5pm, traveling up 61 north. From around the Hwy U exit, I could see dark smoke in the sky above Moscow Mills. As I got closer, I could tell it was coming from near our neighborhood. I was worried it was a house fire because it was so heavy. As I came down Tropicana Village Dr, the smoke was hanging in the air making it look hazy. Upon getting out of my car, I was immediately hit with a terrible smell. It kind of burned my eyes and throat, so I hurried quickly inside. Every time someone opened the door to let the dog in/out, we could immediately smell that awful, toxic smell in the air. We were all asking "What is that smell? That smells awful!" It did not smell like they were burning organic things like trees & leaves. It had a chemical, plastic type smell. The air around our house looked hazy until late evening. I was doing laundry and I could smell it through our dryer vent. If we stood near a door or window, we could smell it. My youngest child has been having some random coughing spells on these nights where they are burning things and he had a lot of coughing on Monday the 11th when it was at it's worst. I have not taken him to the doctor, but I will if it continues. He is not/has not been sick. I think his lungs are irritated from whatever they are burning. Also, my grown daughter who still lives with us went to urgent care Tuesday morning and was diagnosed with BACTERIAL (not viral) pneumonia. She had been experiencing symptoms for about a week prior to the diagnosis. I wonder if the construction site burning over these past few weeks caused her illness. There is no way to prove it. But nobody in our family has had any colds or viruses, so where did her pneumonia come from? I'm tired of smelling whatever they are burning and the city doesn't seem to want to do anything about it. I'm worried for our health. " <b>Conclusions:</b> I performed an onsite site investigation and did not find any open burning violations.

<b>Concerned Party:</b> Craig Kelley <b>Concern Info:</b> I spoke to Craig Kelley who had an open burning concern. His concern was about the open burning in Moscow Mills in relation to the Pollard Development site off Hwy 61. Craig said the area that is being developed does not have a location where it is greater than 200 yards from the nearest unoccupied structure. Craig provided an parcel map that illustrated his point. <b>Conclusions:</b> I conducted a site visit to the property and verified that the burn piles were not greater than 200 yards from an occupied structure. A letter of warning will be sent out.

<b>Concerned Party:</b> Taylor Settle <b>Concern Info:</b> We recieved a fowarded email about an open burning concern. The CP states: Hello,  My name is Taylor and I work at the Lincoln county Health Department. I am reaching out regarding an open air burning issue and I am not sure if this is the right department so if not, please let me know.  I have attached a picture of a house that has been intentionally set on fire to demolish it quicker. It is causing a lot of black smoke in the air so I just wanted to report it.  The address is 1577 Hwy B, Elsberry, MO 63343 Brian Gnade  Let me know if you need anything else! <b>Conclusions:</b> 12/31/24 MSC: Based on the findings of the investigation Brian Gnade, the owner of 1577 Hwy B, was not in compliance with applicable provisions and limitations listed within 10 CSR 10-6.045 "Open Burning Requirements". A letter of warning will be sent to the property owner containing and open burning acknowledgment form, fact sheets, and a copy of 10-CSR 10-6.045. Fact sheets will also be sent to Andy Burkemper, upon his request.

<b>Concerned Party:</b>	Trent Francis							
<b>Concern Info:</b>	We received an odor concern from the DNR webpage. The CP states :I live at 2405 Mette Rd - Me and my Family have developed GI trac infections, headaches, sick in the mornings and most recently diagnosed w Barretts Esophagus. Tonight we left another message of many of foul smells associated with the plant. From rotten egg smells at dusk to the last three days of a deer urine smell constantly. We are also loosing all our white oaks to disease and all our maple tree's trunks developed a black mold on them thus indicating fungus growth. Is me and my family safe? Is our well water safe? I would like the plant researched at this point. Thank You							
<b>Conclusions:</b>	I conducted a site investigation with WPC personnel and we did not find any violations during the visit.

60240	12/6/2024	12/6/2024		Asbestos	/	SLRO	RA	
<b>Concerned Party:</b>	Ricky Harry							
<b>Concern Info:</b>	We recieved an asbestos concern from the DNR website. The CP states: I had a building with asbestos shingles and the only demolition permit and was in the process of taking all the shingles off when the county had Tammy Schaefer of pontoon beach Illinois come in 7 day's prior to court document's stated they supposed to without a permit or notifying the EPA that they were tearing down my building with a track hoe hauling away in dumptrucks not bag up no ideal where they disposed of it? Isn't that illegal and shouldn't they have to have record's of wherever they disposed of it as should the county's code enforcement department as well being they allowed it to happen knowing the guidelines that should have been followed?							
<b>Conclusions:</b>	I talked to the CP and the demolition of the building ocured in February of 2018. This is outside our statue of limitations and the building and debris is gone. I looked up satillite imaging to confirm the building is no longer there.

<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>	We recieved an anonymous odor concern. The CP states: My back yard and whole neighborhood smells of chemical, sulfur, nasty smell. When I cross the Mississippi River I smell a very similar smell passing Sauget and I believe that is the source. It is right across the river from us in tower grove south. It is more noticeable when I leave town and return as I believe that my nose becomes used to the smell. It seems to be worse in early mornings and at night ( times when chemical plants commonly release toxins). Please investigate this is making us want to leave the city.							
<b>Conclusions:</b>	An odor investigation and site visits were conducted through South City St. Louis. No violations of 10 CSR 10-6.165 were noted.
